Sponsorship Information

OUR TEAM

Founded in 2006, we are a team of students and mentors from Westwood High School who are passionate about building robots and participating in robotics competitions. Students work side-by-side with talented mentors who care about fostering the next generation of scientists, engineers, software developers, and business entrepreneurs.

As part of our mission, we give back to the community by introducing younger students to robot design, programming, and other STEM skills.

We participate in the *FIRST* Robotics Competition. *FIRST*, “For Inspiration and Recognition of Science and Technology”, is a foundation whose mission is to inspire young people to become science and technology leaders by engaging them in exciting mentor-based programs that build science, engineering, and technology skills.

WHAT IS FRC?

FIRST Robotics Competition (FRC) is an international high school robotics competition. Teams of high school students design and build unique robots, up to 120 pounds each, fit to a different challenge each year. Teams must buy and make their own specialized parts. Game details are revealed at the beginning of January and the teams are given six weeks to construct and test a competitive robot that can operate autonomously and by wireless controls to accomplish the game’s task.

SPONSORSHIP

Running a robotics team at this level is expensive. Last year, we were invited to the FRC World Championship; unfortunately, we did not have enough funds to attend! Without your imperative support, we would not be able to compete or sustain our mission of enriching the next generation with such valuable skills.
