Westwood Robotics, Inc. 2022-2023

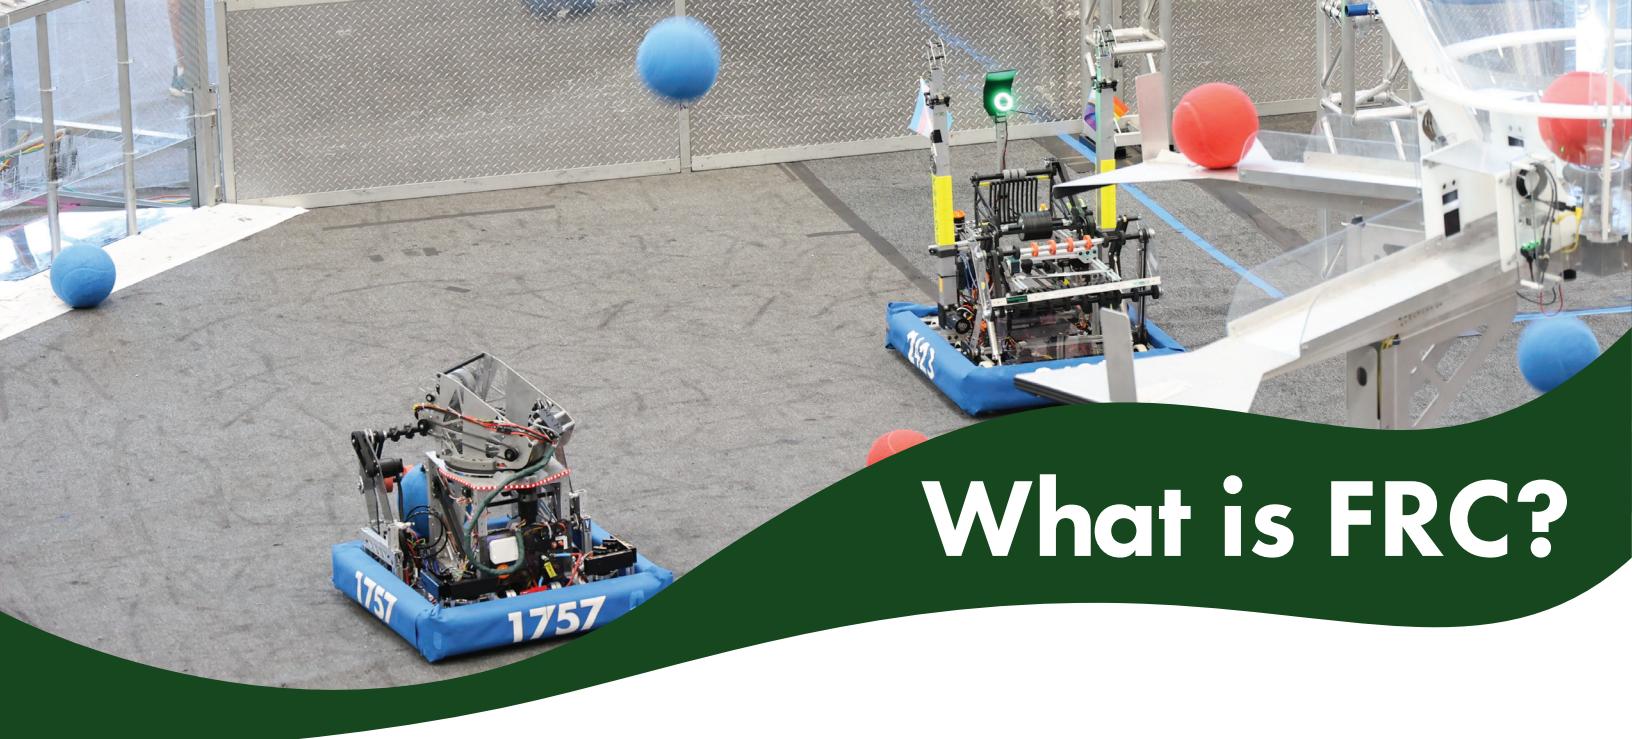

Our Team

Founded in 2006, we are a student-run team from Westwood High School who are passionate about robotics. Our skillful mentors work side-by-side with us to help foster the next generation of scientists, engineers, software developers, and business entrepreneurs, all while giving students room to independently innovate and lead the team. We participate in the FIRST Robotics Competition, where we compete against other teams in our region.

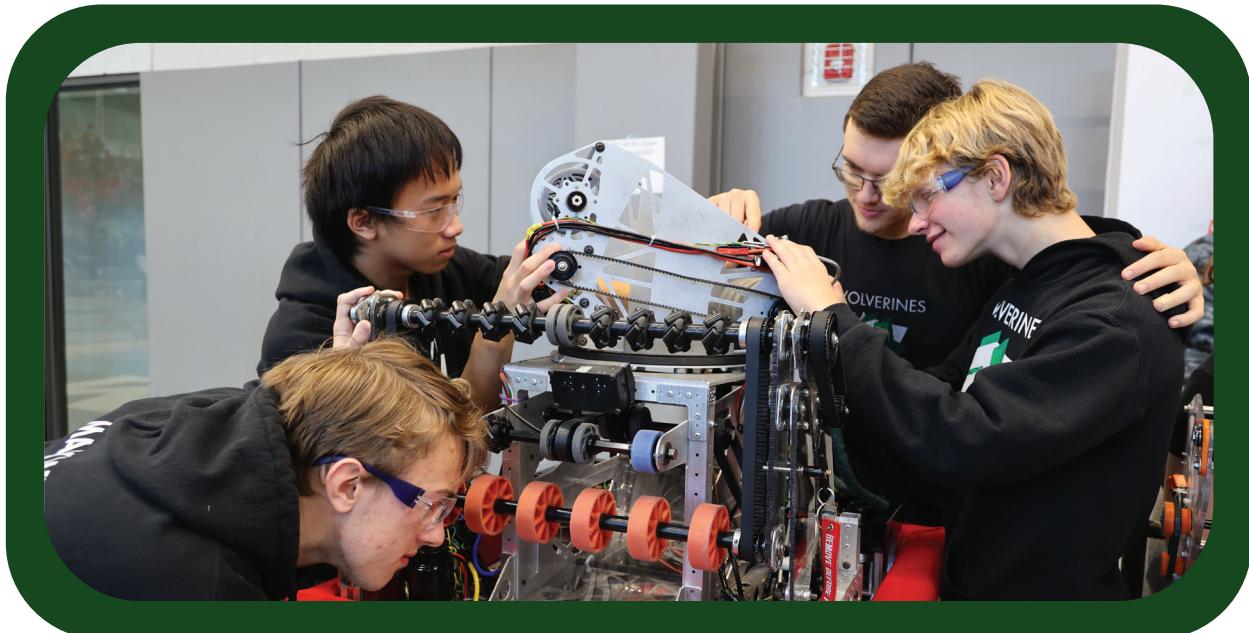

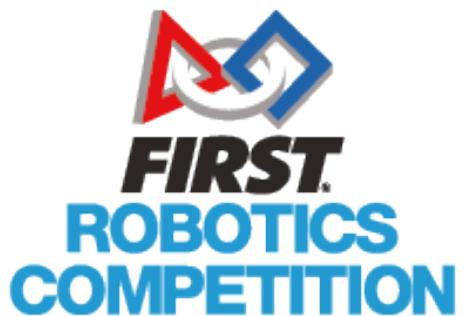

As part of our mission, we give back to the community by introducing younger students to robot design, programming, and other STEAM skills.

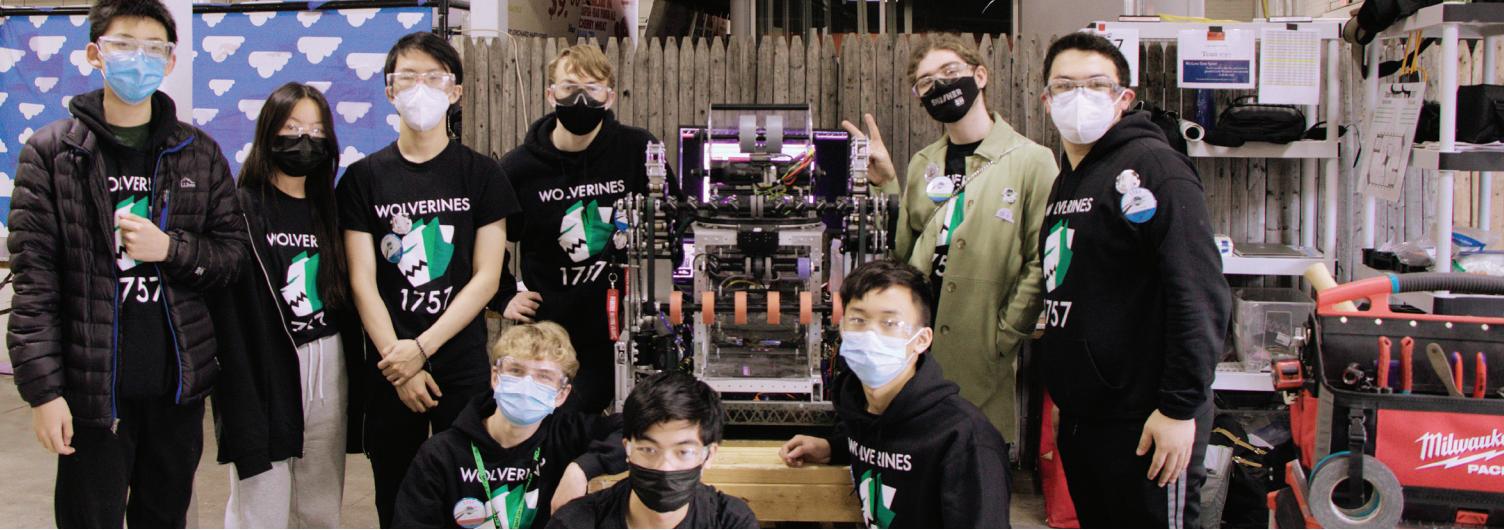

What is FRC?

FRC, "FIRST Robotics Competition", is an international robotics competition for ages 14-18. At the start of every year, teams around the world obtain details about the new game; they are given six weeks to develop and test a brand-new robot to work around restrictions and reach the goals of the competition to the best of their ability.

FIRST, "For Inspiration and Recognition of Science and Technology", is a non-profit foundation whose mission is to inspire the youth to become leaders in science and technology by engaging them in exciting mentor-based programs that build science, engineering, and technology skills.

SPONSORSHIP

From building robots to attending competitions, the cost of running a robotics team at a high level adds up quickly. Previously, we were invited to the FRC World Championship; unfortunately, we did not have enough funds to attend!

We receive funding from our school to attend two district competitions per year, but without your imperative support, we would not be able to further challenge ourselves against tougher opponents or sustain our mission of enriching the next generation with such valuable skills.

ALL DONATIONS ARE TAX DEDUCTIBLE

Westwood Robotics is a 501(c)(3) non-profit organization. A W-9 form can be provided upon request. If you have any questions regarding your donations, please feel free to contact us through email or visit our website.
